After years of helping patients with their allergy, asthma, and immunology needs through a corporate practice, Dr. Manjul Dixit opted to branch out and open her own office in September, 2010. "I just think that our healthcare system has become far too corporate driven, and we have lost sight of the needs of the individual. I strive to bring back the needs of the individual, and my entire practice is built around providing the best concierge-level service possible, while still accepting most standard insurance coverage," says Dr. Dixit.

Building on these beliefs, Dr. Dixit opened the doors to Atherton Allergists. Flexible office hours, a comfortable office environment, a friendly staff, and ample free parking all make Atherton Allergists a better solution for your allergy and asthma needs.

What is a blow dry bar? Owner Rosemary Camposano says "For women like me, the days of lavishing myself with spa treatments are over! I'm too darned busy! I have a simple rule-of-three — 1) stay fit, 2) take care of my skin, and 3) **HAVE GREAT HAIR!** No cuts. No color. Just fabulous blown out hair... every day!"
